PROJECTS

Python based Voice Assistant

<https://github.com/RohitShailesh/PythonVoiceAssistant>

Voice assistant which is programmed to automate and perform tasks like playing songs and videos, searching Wikipedia for information, tells jokes, tells interesting facts, reciting latest news , telling real time weather forecast. It is an AI powered project (it uses Speech Recognition module) which is made using python programming.

Arduino based Smart Dustbin

<https://drive.google.com/file/d/1pYCrHOFH5xSYbjiRpMpEFnCt4hDzKyor/view?usp=sharing>

Smart dustbin using simple Arduino board, servo motor and an ultrasonic sensor. Whenever you bring your hand close to the ultrasonic sensor it will automatically give signals to the servo motor using the program on the Arduino board and as a result the lid of the smart dustbin will open and you'll be able to throw your trash.
